If no picture through multimedia projector from laptop (Apple):

**TIP:**
It is always best to connect the multimedia projector to your laptop and turn it on BEFORE you start up your laptop.

Plug in the **Apple VGA Adapter** into the **Video output** port.

Go to the **Dock**, click on **System Preferences**

Click on **Displays**

![System Preferences](image)

![Displays](image)
Select **1024x768, 60Hz**
Check **Show displays in menu bar**
Click **Detect Displays**

Click **Arrangement**
Check **Mirror Displays** is selected.
Click on **Display** in the Title Bar – this selects the output port resolution. Click **Show displays in menu bar** – this puts an icon in the menubar.

If the Screen looks Odd
Eg.
640x480

Click on the Displays Icon in the menu bar
Make sure that it looks like the following.
