

Blended Learning

Attend the short workshop & launch of the learning community on blended learning

Facilitated by Dr Catherine Moore & Dr Yasir Al-Abdeli

Times are changing and so should learning and teaching. Can Blended Learning help students take more ownership/responsibility for their lifelong learning; allow lecturers to rejig their class time and bring back the enjoyment of teaching through more interaction; and help deliver student-centred methods via flipped learning and others? Join us to find out and be one of the first to help launch something new - the Learning Community on Blended Learning.

Through interactive discussions and presentations you will have the opportunity to:

- Become familiar with the background, merits and challenges of blended learning;
- Gain awareness of the variety of methods for implementing blended learning; and
- Contribute to the launch of a new and exciting learning community on blended learning.

8th June
12pm-2pm
