Quick Guide: Recover a Panopto Video

This process can only be done on the computer that recorded the video

1. Return to the windows computer used to record the video
2. Login and open the Panopto recorder
3. Click Manage Recordings at the top and identify the problem video in the Uploaded Recordings section – (see Image below)
4. Click the Set Offline button next to it. This will shift it into the Offline Recordings section
5. Click the Upload to Server button to re-upload
