

How to turn on a room computer in a TEL space

All TEL spaces are equipped with a Windows computer that presenters can use to run their class.

step 1 TURN ON PC

A Windows computer is located on the presenter's desk. Locate its hard drive and press the **power button** to turn it on

*the hard drive may be secured underneath a computer monitor on the presenter desk or inside a lectern stand

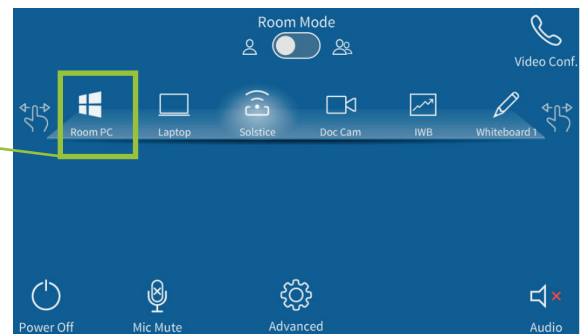

step 2 TURN ON CONTROL PANEL

Once the computer is on, tap on the touchscreen and select **Room PC**

Watch room comfort monitors, speakers and cameras turn on

Room monitors will continue to show default ECU desktop display

step 3 LOGIN

Enter your **ADS login** details

Room computer is ready to use
