In PebblePad, feedback and comments allow others to engage with your Assets. Feedback is part of a formal assessment process and is usually provided on Assets shared for assessment to the ATLAS Workspace. Feedback may include feedback comments, completed feedback templates, grades and approvals. There are several ways to find your feedback:

1. You can see when an asset has feedback from the asset store – the Comments or Feedback icons will be illuminated. In the example below only the Feedback and Shared for assessment icons are illuminated.

Click on the icons to open the information panel and then click on the Comments or Feedback tabs to view.

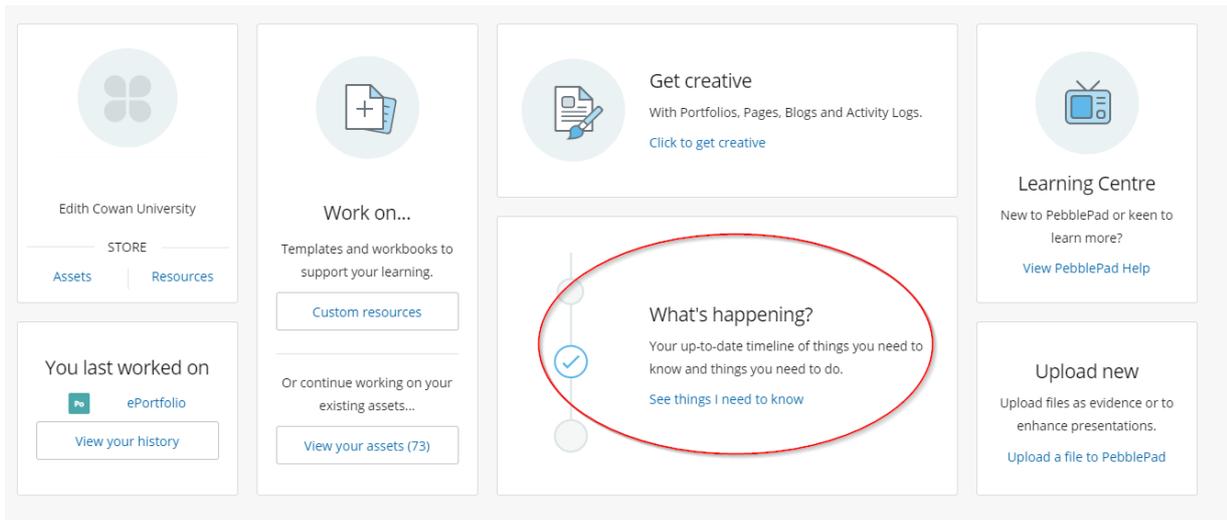

2. If you are in the asset, go into preview mode and you will see the blue comment and feedback icons on the top right.

3. You can check in **What's happening** on the Pebble+ home page

4. If you have notifications for Feedback and Comments enabled, you will also receive an email when feedback or comments have been left on your Asset.

   Notifications are found under Additional Settings from the 'Burger' menu.
