Student Maps

Guide for Students

Student Maps Guide Contents

Start from the beginning of this guide, or click through to the relevant section.

Where to find your Student Map

The roll out of Student Maps from Summer 2024 is gradual and not all courses or versions of courses will be available, so don't panic: if there is not a Student Map available for the course you are enrolled in yet.

PDF course planners will continue to be used as per current practice for courses/versions that are not available in Student Maps yet.

You can check which courses & versions will be available [here](#).

If there is a Student Map available for your course, a link will be provided as part of My Uni Start when you first accept your course and enrol at ECU.

Alternatively, [Student Hub](#) will provide you with a direct link the next time they assist you with advice about enrollment or course progress.

How to open your Student Map

1. Click on the student maps link sent by the Student Hub or as per your My Uni Start enrolment information.
2. Click on the Student Map for your current course.
3. The view should look similar to this once open.
4. If you are logging in for the first time, you should click here and make sure you understand the legend first. It's coming up next in this advice.

How to read your Student Map: Student Map Legend

1. When you go into the Student Maps planning section, view the legend so you can understand what the symbols, words and colors mean. You can show and hide the full legend by clicking here.
2. As you plan and progress through your course the various indicators described in the legend will appear next to your units.
3. Use Triangles to see the prerequisites or equipment units that can be found when you click these buttons.
4. Use colored circles to see any planned units indicating your enrolled, planned or completed units are not part of the Map. This might be in the wrong unit!
5. To help with your planning, the enrolled, planned and completed units are studied in different colors.
6. Symbols for unit progress show if there is a 'galar' or what your Specialisation/Major/Minor is completed, what units are enrolled in and what you still need to complete to finish your course. There are also other indicators, like Credit and Recognition of Prior Learning (CPL). CPL is listed as "Advanced Standing credit" in the legend.
7. You can select your chosen Specialisation/Major/Minor from the dropdown menu.
8. You will need to click on the 'Plan' button to see your chosen Specialisation/Major/Minor with the Student Hub. Selecting/Changing it in your Student Map does not automatically add your selection to your student record.

How to read your Student Map: Snapshot Viewer

1. Check the snapshot view **before** anything else. There may be an updated snapshot of your Student Map waiting for you. Student Hub may have sent you an email with a direct link if they have updated your Map. Click on "Snapshot Viewer".
2. You can see all available Snapshots in descending order for easy selection. Click on the snapshot you wish to view.

If there are no snapshots, or it has been a while since you had an updated Snapshot, you can contact the [Student Hub](#), who can assist with checking your current enrolment and complete an updated Snapshot for you.

How to read your student map: Units Section

1. The "Units" panel on the right hand side of the five planning area shows either a full view of the units required to complete the course, or a Teaching Period view.
2. This section only searches the units section - it is not a search of the full handbook.
3. These headings will indicate the Teaching period if relevant and the type of unit (e.g., Core, Elective, Option).
4. All units can be filtered on the handbook, if you want to use the unit description.
5. Click on the "Teaching" button to expand and view any prerequisite requirements, incompatible and equivalent units. You can still plan units with warnings, but if the rule is not met, SIMO will not allow you to enrol into the unit.
6. The credit point value of a unit is shown here.
7. Incompatible - cannot do both the listed unit (EP0002) and the incompatible one (EP0003) at any of the course. You receive three icons.
8. All units can be filtered on the handbook, if you want to use the unit description.
9. Transition - Equivalent Unit

How to read your Student Map: Planning Section

1. The status of all units on your record in the nominal course, are in the planning section of your Student Map.
2. If there are specialisation/prerequisite in the course, you can filter them from here.
3. All units that are currently enrolled and planned here and appear in blue.
4. This is where you can plan units and/or view planned units. See "How to Plan a Student Map" further in this guide, for more information on planning units.
5. Units showing here in Red have been attempted and passed.
6. Units showing here with a light grey background have been attempted but withdrawn prior to academic census date.
7. Units showing here have been credited to your record as CPL. It is the legend that is relevant for "Advanced Standing Credit".
8. Units showing here in Green have been attempted and passed.

How to read a Student Map: Specialisations/Major/Minor

1. Student Maps for courses with a specialisation/major/minor selection will have an additional selection option at the top of the Student Map in the planning section.
2. If you wish to have a Specialisation/Major/Minor in your course, click to "Show the unit selection in Student Maps".
3. Click on the pencil to select the relevant specialisation/major/minor.
4. Click on Choose SPECIALISATION and a dropdown will appear. Select the relevant option.
5. Click continue.

How to add your units to SIMO from a Student Map

1. When you click on "Enrol in Planned Units", a warning will appear in SIMO, Self Enrolment section.
2. The course code and title will show here.
3. The Academic Period you are enrolling in will show here.
4. If your enrolment period is available, it will be marked here.
5. If your enrolment period is available, click here to start your enrolment.

Where to find your Student Map

The roll out of Student Maps from Summer 2024 is gradual and not all courses or versions of courses will be available, so don't panic if there is not a Student Map available for the course you are enrolled in yet.

PDF course planners will continue to be used as per current practice for courses/versions that are not available in Student Maps yet.

You can check which courses & versions will be available [here](#).

If there is a Student Map available for your course, a link will be provided as part of My Uni Start when you first accept your course and enrol at ECU.

Alternatively, [Student Hub](#) will provide you with a direct link the next time they assist you with advice about enrollment or course progress.

How to open your Student Map

1. Click on the student maps link sent by the Student Hub or as per your My Uni Start enrolment information.

2. Click on the Student Map for your current course.

The screenshot shows the 'Select Course' page in the ECU Snapshot Viewer. The user is identified as Tessie TESTER (ttester). The page lists two courses: '900 Non Award Studies (VET)' and 'C28 University Preparation Course'. The 'C28' course is highlighted with a blue bar.

3. The view should look similar to this once open.

The screenshot shows the 'My Map' page in the ECU Snapshot Viewer. The user is identified as Tessie TESTER (ttester). The page displays 'Planned Units' (0) and 'Enrol in Planned Units' (0). A 'Show Legend' button is visible. The legend shows 'Required Units Teaching Period 1' with a list of units: (EPU0001) Learning Skills (15), (EPU0002) Academic Writing (15), (EPU0003) Essential Mathematics (15), (EPU0004) Humanities (15), and (EPU0005) Science (15). The legend also shows 'CORE UNITS' and 'OPTION' sections.

4. If you are logging in for the first time, you should click here and make sure you understand the Legend first. It's coming up next in this presentation.

How to open your Student Map: Changing maps

Tessie TESTER (ttester) Snapshot Viewer Logout

C28 University Preparation Course / C28 University Preparation Course Commencement Date: Not Commenced

1. If there are alternate Student Maps available for your course (e.g. part time structure) and you want to change your view to one of them, click here.

4. If you select a new Student Map, (e.g. part time), any changes you had made in the planning section of the current student map will be lost.

You **can** still access snapshots in the Snapshot Viewer that have been created and saved by Student Hub previously for any of the Student Maps available to you.

3. Click on the relevant Student Map to move into the 'live' planning section.

Tessie TESTER (10010661) C28 University Preparation Course

Change Map

If you select a new Map, it will replace your Current Map. All previous selections in the Map will be lost.

- C28 University Preparation Course **Current Map**
- C28 University Preparation Course Part Time

2. The green "current map" icon indicates that this is the student map that you/or Student Hub were working from when you last logged in.

5. If you have been in **different** courses, click the first course title link to see all the courses you may have a map for. Noting not all courses will have a map available.

Tessie TESTER (ttester) Snapshot Viewer Logout

C28 University Preparation Course / C28 University Preparation Course Commencement Date: Not Commenced

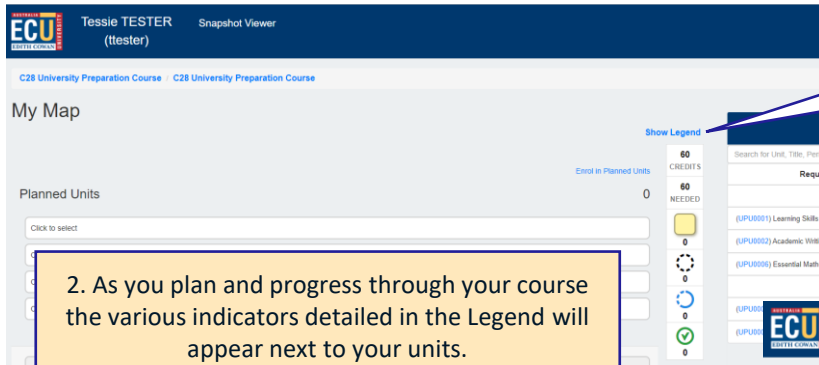

6. Click on the relevant Student Map to view if available.

Tessie TESTER (ttester) Snapshot Viewer

Select Course

- 900 UNCONFIRM Non Award Studies (VET)
- C28 UNCONFIRM University Preparation Course
- C33 UNCONFIRM Bachelor of Science (Nursing)

How to read your Student Map: Student Map Legend

1. When you go into the Student Maps planning section, view the Legend so you can understand what the symbols, words and colours mean. You can show and hide the full Legend by clicking here.

2. As you plan and progress through your course the various indicators detailed in the Legend will appear next to your units.

3. Unit Information (like pre requisites or equivalent units) can be found when you click these buttons.

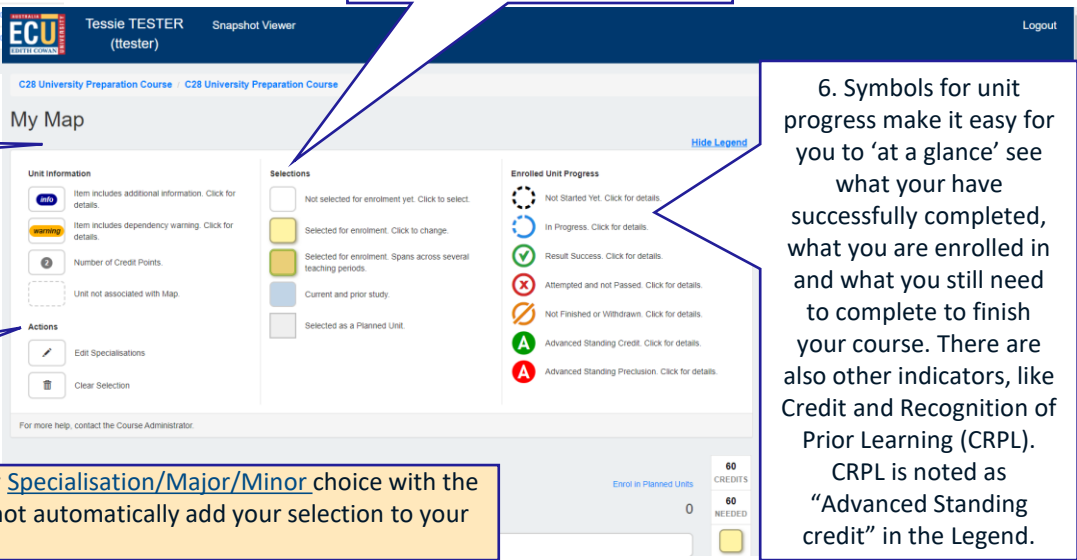

4. Seek assistance if you see dotted lines indicating your enrolled, planned or completed units are not part of the Map. You might be in the wrong unit!

7. You can select your chosen Specialisation/Major/Minor* or clear your planned units using the action buttons.

8.*You still need to make sure you have officially recorded your Specialisation/Major/Minor choice with the Student Hub. Selecting/changing it in your Student Map does not automatically add your selection to your student record.

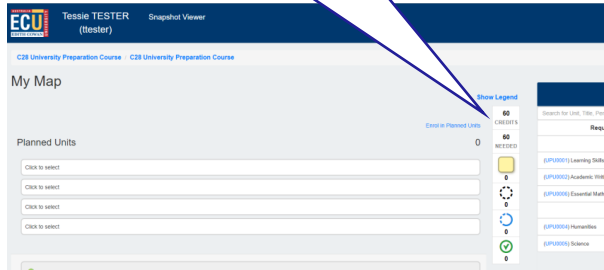

5. To help with your planning, the enrolled, planned and completed units are shaded in different colours

6. Symbols for unit progress make it easy for you to 'at a glance' see what you have successfully completed, what you are enrolled in and what you still need to complete to finish your course. There are also other indicators, like Credit and Recognition of Prior Learning (CRPL). CRPL is noted as "Advanced Standing credit" in the Legend.

How to read your Student Map: Student Map Legend

1. The vertical panel underneath the Legend link provides quick calculations.

2. The “Credits” section shows the total credit points required for course completion.

3. The “Needed” section shows how many credit points you still need overall, after your completed, enrolled and planned units are calculated.

4. This shows how many credit points you have ‘planned’.

5. This shows how many credit points you have for units that have not been started yet.

6. This shows how many credit points you are enrolled in.

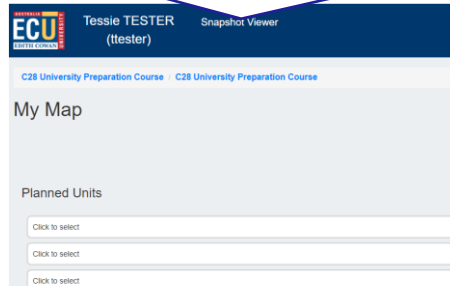

7. This shows how many credit points you have already passed and completed.

8. Seek assistance from the [Student Hub](#) if it looks like your credit points are not showing/calculating correctly!

How to read your Student Map: Snapshot Viewer

1. Check the snapshot viewer **before** anything else. There may be an updated snapshot of your Student Map waiting for you. Student Hub may have sent you an email with a direct link if they have updated your Map. Click on “Snapshot Viewer”.

If there are no snapshots, or it has been a while since you had an updated Snapshot, you can contact the [Student Hub](#), who can assist with checking your current enrolment and complete an updated Snapshot for you.

2. You can see all available Snapshots in date order for easy selection. Click on the snapshot you wish to view.

Snapshot Date	Snapshot By	Course	Course Title	Map Title
2023-07-19 16:19:25 AWST	Rebecca Adelle HERCZYKOWSKI	C28	University Preparation Course	C28 University Preparation Course

How to read your Student Map: Snapshot Viewer

1. Your name, Student ID, course code and title, as well as details of when and who the Snapshot was prepared by will appear here.

2. Any units that have been planned for you by Student Hub will appear in the planned units list.

3. You still need to go to SIMO to enrol into planned units. A link to SIMO can be found in the planning section of your Student Map.

5. Student Hub will only use the comments box to refer you back to the corresponding email/case number. Check the email sent to your ECU student email account for further comments and advice.

6. Click close to return to the list of available snapshots.

Map Title

7. The home button from the list of snapshots takes you back to the planning section of your Student Map.

8. If you think your Snapshot is not up to date, you can contact the [Student Hub](#), who can assist with checking your current enrolment and complete an updated Snapshot for you.

4. Make sure you read the this.

The screenshot shows the 'Snapshot Viewer' interface. At the top, there is a header with the ECU logo, 'Student Name', 'Snapshot Viewer', and a 'Logout' link. Below the header, the word 'Snapshot' is displayed in large text, followed by a 'Home' link. The main content area contains the following information:

- Student ID: [Redacted]
- Student Name: [Redacted]
- Course: C28 University Preparation Course
- Map Name: C28 University Preparation Course
- Snapshot prepared by: [Redacted]
- Date: 2023-08-17 15:18:22 AWST

A table titled 'Planned Units' is shown with the following data:

Unit Code	Unit Name	Credits
(UPU0001)	Learning Skills	15
(UPU0002)	Academic Writing	15
(UPU0006)	Essential Mathematics	15
(UPU0004)	Humanities	15

Below the table, there is a paragraph of text: 'The enrolment advice planned on your Student Map is not an enrolment. To complete your enrolment, you must use SIMO to enrol into your planned units. At the time of creating a Student Map Snapshot, ECU staff plan based on unit availability and prerequisite restrictions, which may prohibit full-time enrolment in certain semesters. It is important that you complete the units prescribed on your Student Map in the Teaching Periods indicated, any deviation may extend your completion timeframe. For international students this may mean a Confirmation of Enrolment extension will be required. ECU reserves the right to vary, add or discontinue units in line with curriculum changes. It is the student's responsibility to enrol correctly and pass the necessary units to complete the course.'

At the bottom of the main content area, there is a 'Comments' section with a text input field labeled 'Refer to case #' and a 'Close' button.

How to read your student map: Units Section

1. The “Units” panel on the right hand side of the live planning area shows either a list view of the units required to complete the course, or a Teaching Period view.

Teaching Period view, unless otherwise noted, is based on a full time load and Teaching Period 1 = the first teaching period you will be studying. i.e. it could be Semester 1, Semester 2, Summer etc.

9. These headings will indicate the Teaching period (if relevant) and the type of units/advise e.g., Core, Electives, Option etc.

8. All units are live linked to the Handbook, if you want to see the unit description.

7. Incompatible = cannot do both the listed unit (UPU0005) and the incompatible one (UPU0004) as part of the course. You only choose one.

6. Translation = Equivalent Unit

A detailed view of the 'Units' panel. It features a search bar at the top: 'Search for Unit, Title, Period, Elective or Specialisation...'. Below the search bar, the units are grouped under 'Required Units Teaching Period 1'. The first group is 'CORE UNITS', which includes:

- (UPU0001) Learning Skills (15 credit points)
- (UPU0002) Academic Writing (15 credit points, with an 'info' button)
- (UPU0006) Essential Mathematics (15 credit points, with an 'info' button)

A translation box shows 'Translation: UPU0003'. The second group is 'OPTION', which includes:

- (UPU0004) Humanities (15 credit points, with an 'info' button)
- (UPU0005) Science (15 credit points, with a 'warning' button)

A warning box for UPU0005 states: 'Warning: You may not be able to enrol in this unit. Check the information below or see your course adviser.' Below this, an incompatibility box shows 'Incompatible: UPU0004' and a translation box shows 'Translation: UPC0005'.

2. This Search only searches the units' section – it is not a search of the full handbook.

3. The credit point value of a unit is shown here.

4. Click on the 'info' button to expand and view any important information.

5. Click on the 'warning' button to expand and view any prerequisite requirements, incompatible units and equivalent units. You can still plan units with warnings, but if the rule is not met, SIMO will not allow you to enrol into the unit.

How to read your student map: Units Section

(CS3207) Network Security Fundamentals	15

1. You can also use the Units section of Student Maps to see the progress you have made across the whole course.

2. Some courses will show the same teaching period structure as the handbook, especially where there is a preferred order for you to complete units.

3. Some courses will show as a 'list' view where units are grouped into core, core elective, majors, minors, specialisations.

4. Use the slide bar on the side to scroll up and down the recommended structure.

Units	
Search for Unit, Title, Period, Elective or Specialisation...	
Masters Required Units	
CORE UNITS	
(ENS5111.4) Engineering Practicum	0
(ENS5543.6) Engineering Management	15
(ENS6126) Master of Engineering Project 1	15
(ENS6127) Master of Engineering Project 2	15
(ENS6139) Engineering Innovation and Ethics	15
SPECIALISATION	
(SPAAPD) Chemical Engineering - Unit Set Core Units	
(ENS5209) Process Control	15
(ENS5270) Engineering Mathematics	15
(ENS5556) Heat and Mass Transfer	15
(ENS6172) Unit Operations and Process Control	15
(ENS6160) Signals and Systems	15
(ENS6166) Process Engineering Fundamentals	15

(ENS5161) Environmental and Process Risk Management	15
(ENS5561) Minerals and Solids Processing	15

5. You will be able to see if the unit is completed, enrolled, been given credit, attempted and not passed or planned, by looking at the Legend symbol on the left of the unit code.

This is helpful if you want to 'at a glance' see your progress over the whole course or, where everything fits into your course.

How to read your Student Map: Planning Section

1. The status of all units on your record in the nominated course, are in the planning section of your Student Map.

Students and staff can also plan future enrolments in this section.

Staff can take a snapshot of anything they plan for a student.

3. All units that are currently enrolled will be noted here and appear in blue.

4. This is where you can plan units and/or view planned units. See “How to Plan a Student Map” further in this guide, for more information on planning units.

5. Units showing here in RED have been attempted and not passed.

6. Units showing here with a light grey background have been attempted but withdrawn prior to academic census date.

7. Units showing here have been credited to your record as CRPL. In the Legend this is referred to as “Advanced Standing Credit”.

8. Units showing here in Green have been attempted and passed.

2. If there are specialisations/majors/minors in the course, you can select them from here. See [Specialisations/Major/Minor section](#) in this guide.

How to read your Student Map: Planning Section

The screenshot displays the 'Planning Section' of a student map, organized into several categories:

- Enrolled Units:** Shows one unit, 'gns0111.0 Engineering Practicum'.
- Planned Units:** Includes a search bar and a 'Click to select' button.
- Units Attempted and Not Passed:** Lists three units with red status indicators:
 - gns0245.0 Industrial Control
 - gns0195.0 Microprocessor Systems (Grade: FI - FAIL INCOMPLETE REPEAT UNIT)
 - gns0253.0 Control Systems (Status: Not Finished or Withdrawn)
- Credit and Recognition for Prior Learning (CRPL):** Shows 'gns0543.0 Engineering Management' with an 'Advanced Standing Credit'.
- Passed Units:** Shows 'gns0616.2 Data Communication and Computer Networks' with a 'Success' grade (CR - CREDIT).

1. If you click on the icon next to the unit an expander will give you further information on the status and grade of the unit.

*Note it will not give you the numerical mark, you will still need to view this in SIMO.

This block shows three detailed views of unit status expanders:

- Red Expander:** (ENS0195.0) Microprocessor Systems. This unit has a result of Attempted and Not Passed. Grade: FI - FAIL INCOMPLETE REPEAT UNIT.
- Grey Expander:** (ENS0253.0) Control Systems. This unit has a status of Not Finished or Withdrawn.
- Grey Expander:** (ENS0543.0) Engineering Management. This unit has been granted an Advanced Standing Credit.
- Green Expander:** (ENS0616.2) Data Communication and Computer Networks. This unit has a result of Success. Grade: CR - CREDIT.

Unit not associated with Map.

Passed Units

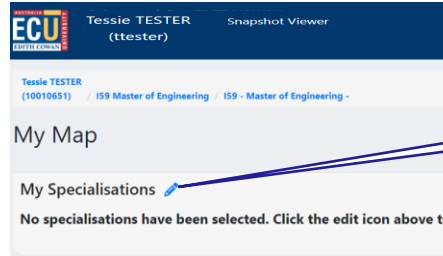

(ENS0616.2) Data Communication and Computer Networks

2. [Seek assistance](#) if you see dotted lines indicating your enrolled, planned or completed units are not part of the Map. You might be in the wrong unit!

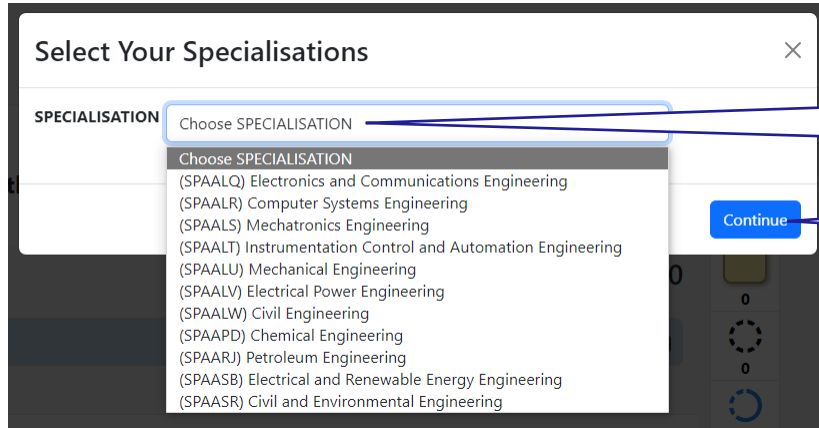

How to read a Student Map: Specialisations/Major/Minor

1. Student Maps for courses with a specialisation/major/minor selection will have an additional selection option at the top of the Student Map in the planning section.

2. If you do not have a Specialisation/Major or Minor in your course, skip to "[Planning your enrolment in Student Maps.](#)"

3. Click on the pencil to select the relevant specialisation/major/minor.

4. Click on Choose SPECIALISATION and a drop-down list will appear. Select the relevant option.

5. Click continue.

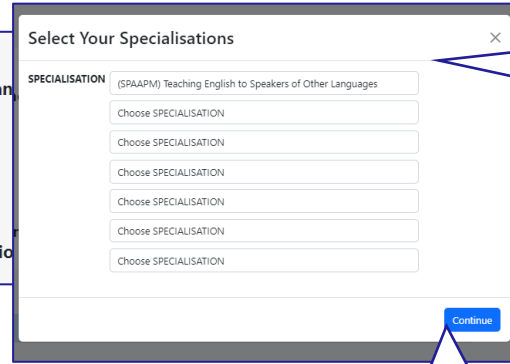

How to read a Student Map: Specialisations/Major/Minor

1. The selected specialisation/major/minor will show here.

2. For some courses multiple options may appear, even though you only need to select one option.

Click on the pencil again to make a selection.

3. If you only need to **select one specialisation/major/minor for your course**, start at the bottom and change all drop downs to "choose SPECIALISATION". In the top box, select the specialization you need.

4. If your course requires **multiple specialisation/major/minor selections**, start at the bottom and change all drop downs to "choose SPECIALISATION". Then start at the top again and select a different specialisation/major/minor in each drop down as required.

5. Click continue.

How to read a Student Map: Specialisations/Major/Minor

1. Once your specialisation/major/minor is selected, the units section should 'condense' to only show the structure of your course with the relevant specialisation/major/minors.

Tessie TESTER
(10010651) / 159 Master of Engineering / 159 - Master of Engineering

My Map

2. If after your specialisation selection, the Student Map does not alter, click the second title at the top of the page.

Tessie TESTER
(10010651) / 159 Master of Engineering

Change Map

If you select a new Map, it will replace your Current Map. All previous selections in the Map will be removed.

159 - Master of Engineering - **Current Map**
159 - Master of Engineering -
159 Master of Engineering Teaching Periods
159 Master of Engineering Teaching Periods

3. This will take you back to Map selection.
Choose the "Current Map".
This should reset the Map to the new specialisation/major/minor.

4. You still need to make sure you have officially recorded your [Specialisation/Major/Minor](#) choice with the Student Hub. Selecting/changing it in your Student Map does not automatically add your selection to your student record.

5. You are now ready to start planning units for future enrolment.

Planning your enrolment in student maps

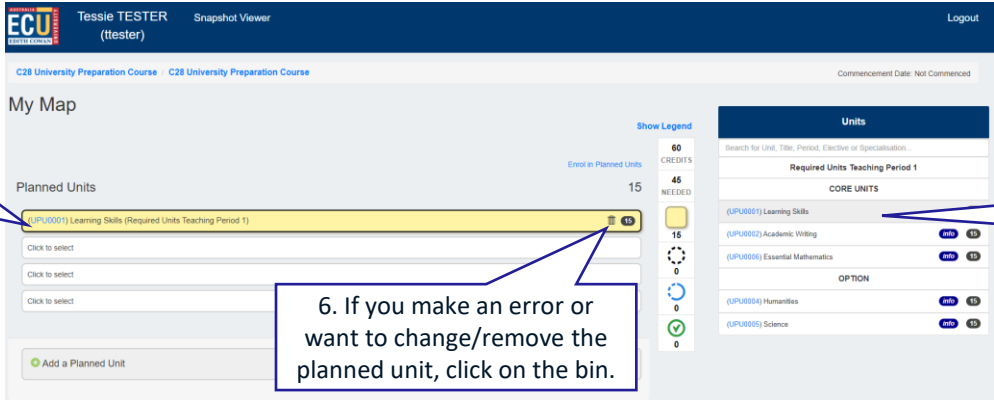

1. Click on an empty “Planned Units” placeholder. It will turn green.

2. From the “Units” section, click on the name of the unit you would like to add.

3. If you click the unit code, it takes you to the handbook.

4. The selected unit will now appear in a planned units placeholder and will be shaded yellow.

6. If you make an error or want to change/remove the planned unit, click on the bin.

5. The selected unit will turn grey in the units section.

Planning your enrolment in student maps

The screenshot shows the 'My Map' page for user Tessie TESTER. The 'Planned Units' section shows 15 units enrolled, with 45 units needed. The 'Units' list on the right includes Learning Skills, Academic Writing, Essential Mathematics, Humanities, and Science. A 'Show Legend' button is visible.

1. Continue until you have selected all the units you want to enrol into for your next teaching period. *Tip, we recommend only planning one or two teaching periods ahead.

2. [Student Hub](#) can assist you with a Student Map snapshot for the entire duration of your course if it is required, however as things can change, and as per above, we will usually only plan for your next one or two teaching periods.

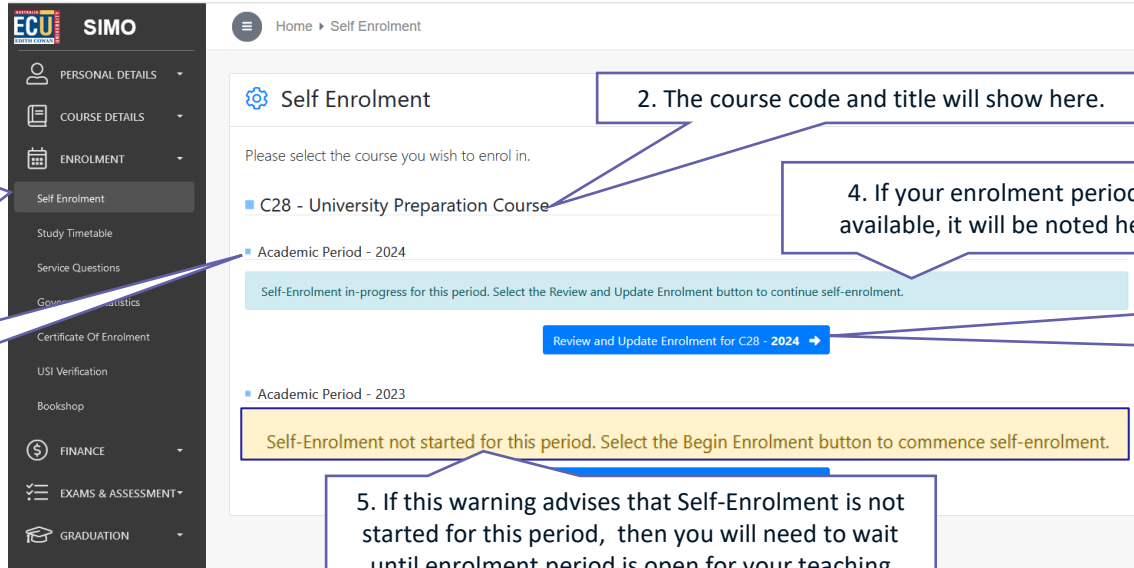

The screenshot shows the 'My Map' page for user Tessie TESTER. The 'Planned Units' section now shows 60 units enrolled, with 0 units needed. The 'Units' list on the right is the same as in the previous screenshot, but the 'Enrol in Planned Units' button is now highlighted in yellow.

3. If [enrolments are open](#), you can click on “Enrol in Planned Units”.

4. If enrolment is not open, you can leave the planned units as they are and exit. The units will be there next time you log in...**unless** ECU staff log into your Map to update it/replan. What they do will override what you have planned.

5. You can contact the [Student Hub](#), who can assist with checking your planned enrolment and complete an updated Snapshot for you.

How to add your units to SIMO from a Student Map

1. When you click on "Enrol in Planned Units", a new page will open in SIMO, Self Enrolment section.

3. The Academic Period you are enrolling in will show here.

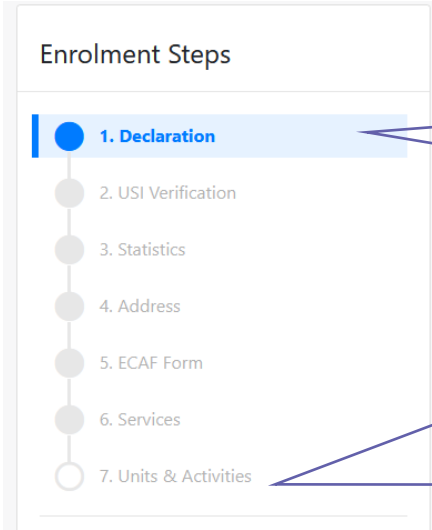

2. The course code and title will show here.

4. If your enrolment period is available, it will be noted here.

6. If your enrolment period is available, click here to start your enrolment.

5. If this warning advises that Self-Enrolment is not started for this period, then you will need to wait until enrolment period is open for your teaching period. See the [enrolment dates website](#).

How to add your units to SIMO from a Student Map

1. You will need to follow all standard enrolment steps, if you have not already completed them.

2. At Step 7 enrol into the units that are planned and or/listed in your student map snapshot. This includes selecting 'activities' (classes).

If you need help with this step use the [SIMO How to Guide](#)

3. Once you believe you have enrolled correctly, check your study timetable.

ECU.EDU.AU
