## Unit Submission Summary Report

This report shows the individual content items in your site, detailing the number of students who accessed the item, total number of times the item has been accessed, dates of access, and the average time per access for each item.

Use this report to debrief yourself and your team on how students actually interacted with your content and use this information to review unit design and resources used in the unit.

### Overview

#### Statistics per Student

You can drill down to see the individual student statistics for each item.

You can use this data to debrief on how a particular student interacted with the content in your site.

You can also identify outliers in access that may skew the aggregate access statistics of the item.

Content Access Statistics

This report provides data on course items within the course site, including the distinct number of students to access the content, dates of access and average time on the item.

Note: Some rows may appear on the next page. Select the Next Arrow (above) or search for an item by name.

Site Content Details	Student	Access Data				
Content Name		# of Students who accessed the Item	Total Item Accesses	Earliest Date	Last Date	Avg Time (mins) per Access
10 tips for success		5	5	20/07/2015	03/08/2015	0.6134
3 minute neurological examination		1	1	17/08/2015	17/08/2015	2.2

#### Aggregate Statistics

For each item you can view the number of students who have accessed it, how many times it has been accessed, earliest and latest dates of access and the average time in minutes per access.

You can use this information to identify content that is of high value and low value to your students. You can also see which resources you expect to have been highly valued, but were not accessed as you expected. This could indicate an area for improving the design of the site.

## Details

### Using the Report

- **Content Name:** The name of the item in your site. Click on the plus sign icon to expand the content item to display individual student statistics for this item.
- **Student:** When you expand the content item, you can view the access data for each student who accessed this item.
- **# of Students who accessed the item:** The total number of individual students who accessed this item.
- **Total Item Accesses:** The total number of times the item was accessed.
- **Earliest Date:** The first date that the item was accessed.
- **Last Date:** The latest date that the item was accessed.
- **Avg Time (mins) per Access:** The average time in minutes per access that this item was accessed for.
