Viewing Captioned Videos in Panopto

Captions are the text version of a video’s audio content that appears on screen in time with the video.

To watch a caption enabled video, you must view the video in the full screen Panopto view. If the video appears a small window in Blackboard, move your mouse over the video and select the **arrow icon** (1) in the lower right corner of the player.

When you watch a Panopto video that has captions, you can follow along with the text on the left-hand side of your screen, underneath the **Captions tab** (2). You can **search** (3) captions for keywords that are discussed in the video.

You can also use the **CC button** (4) on the right-hand side, in the playback controls so that captions appear more like subtitles.
If you click the **three horizontal dots** (5), you can determine where and how the captions appear.

Allows you to choose where you would like to see the captions. You can have them docked below or overlaid on top of the secondary window. If there is text on the screen or something showing at the bottom of your slides, you might consider choosing to have them docked below.

Choose white text on a dark background, dark text on a light background, or you can have outline text on a transparent background.

Adjust text to small or large size.
