How to use a Document Camera

Document cameras are real-time image capture devices for displaying an object to a large audience

Step 1. Go to presenter's desk

## Step 2. Touch interactive blue Crestron screen on desk

Watch room turn on.

Crestron touchpad

Step 3. Select the Doc Cam icon on the top row

Doc Cam icon will light up on display.
Content under document camera will be
displayed onto main room screens.

Step 4. Place an object under the document camera

This could be a smart phone, engineering cable, hand
written document etc.

Step 5. Watch as vision of the object appears on the dual screens and comfort monitors

Step 6. Advanced settings

If you would like to change the content to display, please
select **'Advanced'** and then **'Sources/Destinations'** on
Crestron screen. Select the source you would like to display
first and then select the destination you would like to
display the content to.

If the document camera is not displaying an image:
Go to the physical document camera on desk and push the power button on the document camera.
