

ALWAYS CHECK BEFORE YOU CLICK!

**Don't help
 others steal your
 information.**

Targeted emails
 from hackers will
 look legitimate at first
 glance.

Make sure the email
 is **genuine** before you
 click on any links!

What to check for:

1. Look for unprofessional spelling or grammar errors.
2. Treat any email you didn't expect to receive with suspicion.
3. Check for odd phrases and word choice based on your knowledge of the sender.
4. Hover over links to see if the web address is legitimate and relates to the email's content.
5. Verify any email that asks for personal information by independently looking up the sender's contact information.
