This Technology is available under licence for **Free**.

A risk awareness training tool

A digital solution that allows large corporations to conduct health and safety tests with their employees while cutting wasted time during data input and marking stages.

This training game involves a series of real-life workplace and situational photos.

The game is customisable allowing samples of your own workplace to be used.

Participants interact with the game by touching the screen where they see examples of workplace hazards.

A digital solution for risk awareness

Key Benefits
