Adding LinkedIn Learning courses to Blackboard

1. In a Blackboard content area, select Partner Content > Content Market (Note: If you are unable to see the menu option, check that Edit Mode is turned ON).

2. In the Content Market page, select the link ‘Browse all content providers’ to reveal the LinkedIn Learning provider. The ‘Browse all content providers’ link becomes ‘Hide additional content providers’.

3. Select the LinkedIn Learning provider.

4. Enter your topic in the search box provided.

5. Select the eye icon to view the course.

6. Select the tick box for the course you wish to insert into Blackboard.

7. Note the selected video items in the selector strip at the end of the page. Click on the arrow to reveal a description of the videos selected.

8. When you have completed video selection, click on the Submit button at the end of the page.
9. On the following page confirm the LinkedIn content selected, then select the Submit button at the end of the page.

10. The selected LinkedIn video will appear as a link with a description at the end of your Blackboard content page. Reposition the link on the page as required.

**Embedding Video**

LinkedIn Learning does not support direct embedding of videos into your Blackboard unit.

If you embedded a video from Lynda.com, this video will become unavailable in March 2020. After that date, your students will see a blank space where the video had been embedded.

If you wish to continue using that video, you must embed it using the mechanism above.

*Note:* you do have a very limited capacity to embed video on your Blackboard page, but you are strongly recommended against this as LinkedIn Learning may make the video unavailable in the future.

If you must embed video, you must create your ECU LinkedIn Learning account, then connect to your personal LinkedIn profile, and then you'll be able to access embed codes for a maximum of 5 videos per month.
