

CALL FOR PARTICIPANTS

Artificial Intelligence, Financial Decisions & Your Future

The rising cost of living, challenges in saving for housing, and uncertainty about the future are shaping how we make financial decisions every day. **Many people are turning to Artificial Intelligence (AI) tools for guidance.**

Can AI really help us navigate trustworthy financial advice to ease financial pressures?

We want to hear your story.

Your experiences, concerns, and perspectives matter, and can help us understand whether AI can meaningfully support personal financial decision-making in uncertain times.

✦ Why your voice matters?

- Help research understand real financial struggles people face today
- Explore whether AI can genuinely support smarter financial choices
- Contribute to shaping future tools that may assist individuals like you

👤 Who can participate?

- Aged 18 – 30
- Has used or considered using AI tools (e.g., ChatGPT, robo-advisors)
- Has thoughts or experiences about managing money, saving, investment or financial planning

📋 What's involved?

- Approximate 15–20 minute interview
- Conducted via Microsoft Teams or in-person at either ECU City or Joondalup campuses
- A safe and confidential space to share your experiences.
